

U.S. Army Corps of Engineers Regulatory Program

NOW HIRING

FULL-TIME AND PART TIME STUDENT EMPLOYEES

Outstanding real-world experience – fieldwork –
exposure to the environmental field

The U.S. Army Corps of Engineers Regulatory Program is looking for graduate students with backgrounds in Biology, Ecology, Physical Science, Biogeography, Environmental Engineering and Physical Geography to work in our Ventura Field Office.

Job duties include implementing sections of the Clean Water Act, reviewing permit applications for projects involving federally protected aquatic resources, coordinating with local, state, and federal resource agencies. Fieldwork includes environmental impact assessment, resource delineation and soil and plant identification. The Corps Regulatory Program is designed to protect aquatic resources (including wetlands) by regulating development projects in these areas.

Graduate students are preferred, but undergraduates are also encouraged to apply. Hours are flexible – academic schedules can be easily accommodated. Benefits are available, and future full-time permanent career employment is greatly facilitated.

Starting pay for graduate students ranges from \$10.75 to \$18.22/hour, depending on level of education and experience.

Interested individuals are encouraged to submit resumes and recent transcripts to David Castanon at dcastanon@spl.usace.army.mil. If you have questions, call Mr. Castanon at (805) 585-2141
